## PROJECTS

- Book My Driver (Web Development, Database Management, UI/UX Design):** Developed a **full-stack** platform using **Spring Boot, MySQL, React.js**, allowing users to easily book drivers for various needs. Book My Driver is a platform tailored for **car owners seeking professional drivers** to operate their vehicles. Ideal for individuals who cannot drive due to personal reasons or prefer to avoid driving, this service connects users with **skilled and trustworthy drivers**. By allowing users to provide their own cars, it **eliminates the need for additional car rental expenses**. Book My Driver offers a **convenient and cost-effective solution** for those who value control over their vehicles while enjoying the **comfort and safety of a professional driving experience**.  
Tech: Spring Boot, MySQL, React.js, BootStrap
- StyleHub (Ecommerce Platform, Inventory Management, Payment Integration):** Developed a **fully responsive ecommerce platform** using **Spring Boot, MySQL, React.js** allowing users to **browse a variety of fashionable clothing, add products** to their shopping cart, and complete **secure purchases** with ease. The platform includes a **smooth user experience** with **easy navigation, real-time stock updates**, and an **integrated payment gateway**.  
Tech: Spring Boot, MySQL, React.js, Tailwind CSS
- AllEars: Companion For Your Mental Wellness (Mental Healthcare, Session Booking, Payment Integration):** Developed a **mental healthcare platform** using **MS.NET, React.js**, offering both **free and paid counseling services**. The platform allows patients to **book sessions with counseling or clinical psychologists** based on their **specific mental health needs**. Patients can **navigate the platform by selecting their mental health category** and easily access either free counseling or paid clinical psychology sessions. The platform ensures a **user-friendly experience** with **clear appointment status** and **billing for paid sessions**.  
Tech: MS.NET, MySQL, React.js
- TaskFocus (Web Development, Event-Driven Architecture):** Developed a **personal to-do tracker** during my engineering studies, designed for **efficient task management**. The tool enables users to **add, delete, and describe tasks**, helping them stay **organized, prioritize responsibilities**, and **maintain productivity** with a **minimalist approach**.  
Tech: React Js, JavaScript, HTML & CSS
